Jaro Thermal's "Neon Sink" Is Very Cool

Jaro Thermal's New 52 x 52 x 12 mm Hypro Bearing Fan / Heat Sink combination is super cool.

Due to this product's patented, synergistic design, the customer is able to benefit from an exceptional level of **Thermal Resistance**, across a large number of modern industry applications. Aside from the sheer beauty of this product, the **NEON SINK's** open-walled structure and large surface area goes the distance in **reducing undesirable heat**.
